

CLEANING

Vikima Seed operate 4 individual cleaning lines, with newest cleaning technology. We handle all items of small size seed. Each individual cleaning line has capacity of 1.200 kg. of clean spinach seed per hour, which include:

- pre-cleaning?- clipper?- brushing machine?- screen fine cleaner?- length separators?- gravity table?- colour sorting?- sizing?- spiral cleaning etc...

Our cleaning lines are controlled and operated both manually and via PC. Furthermore, we operate 10 individual drying lines, supported with dry air from a dehumidifier. Automatic official seed-sampler are installed on all cleaning lines, to ensure independent and representative lot sample, in respect of growers and customers.
