

PROCESSING

Vikima Seed are able to deliver seed, right from the grower, and directly to our customers, within a few hours only.....?!?We can ensure best possible quality seed. We make online registration of all process' like seed reception, cleaning, drying, treatment, packing and shipment. Quality is one of our keypoints with full online traceability. Our staff has long experience in cleaning and handling vegetable seed, and are also supporting, in our quality assurance system.?Vikima Seed test all seed lots in our own laboratory, for physical purity, moisture and germination, in accordance with ISTA rules.

Seed is stored in container boxes, in climate conditioned warehouses, with low relative humidity, ready for packing and shipment. This will ensure a long shelf life.
